

REMOTE OPERATING TECHNICIAN

JOB DESCRIPTION

CCR Technologies owns and operates a fleet of mobile vacuum distillation processing units that can be transported to a customer's refinery or gas plant, providing on-site purification of gas treating solutions while the customer's plant continues to operate. For over 25 years, CCR has successfully reclaimed all conventionally used Amines & Glycols for our valued customers worldwide.

CCR Technologies is currently seeking qualified people to join our team as a Unit Operator Technician. Reporting to the Project Leader, the Operating Technician is responsible for operating vacuum distillation equipment on customer's locations in compliance with established procedures to ensure safety, environmental awareness, quality and production efficiency objectives are achieved and established. We are looking for candidates who are interested in a growth opportunity.

Expect competitive compensation and benefits, together with a safe, high-quality work environment and a great team of friendly and committed individuals.

This position involves frequent travel throughout North America and internationally involving extended periods away from home, and shift work will be required as this is a 24 hour/7 day a week operation.

Results, Outcomes and Measures of Success

- Ensures that product and service output meet established quality policy.
- Ensures established productivity standards are obtained.
- No safety incidents

Specific Responsibilities

- Responsible for adhering to established work and safety guidelines, rules and regulations.
- Interacts with other employees, with vendors, and with customer representatives in a polite, courteous and professional manner.
- Sets monitoring equipment to provide flow of information.
- Captures and prepares samples for analysis in accordance with established protocols.
- Installs, operates, and performs routine maintenance and repairs all types of rotary equipment on gas and fluid flow systems, chemical reaction systems, mechanical equipment, and test instrumentation.
- Responsible for maintaining a neat, clean and orderly work area.
- Ensure all unit and personal protection equipment is maintained and appropriately used always.
- Record and maintain unit inventories
- Responsible for assisting with mobilizing and de-mobilizing the unit
- Assists with mobile unit transportation
- Any other duties of a similar or lesser nature as required.

Specific Skills and Capabilities

Technical Ability

- Understands the unit operating conditions under both normal and other than normal conditions in terms of mass flows, inlet and outlet pressures, process temperatures, frequency variation, and variation in molecular weight of the solutions being processed.

Language Ability:

- Fluent in speaking, reading, and writing English. Ability to read, analyze, and interpret general P&IDs, technical procedures, or governmental regulations. Ability to complete documents required for reporting purposes.

Math Ability:

- Ability to work with mathematical concepts such as probability and statistical inference, and fundamentals of plane and solid geometry and trigonometry. Ability to apply concepts such as fractions, percentages, ratios, and proportions to practical situations.

Reasoning Ability:

- Ability to solve practical problems and deal with a variety of concrete variables in situations where only limited standardization exists. Ability to interpret a variety of instructions furnished in written, oral, diagram, or schedule form.

Computer Skills:

- To perform this job successfully, an individual should have basic knowledge of or the ability to quickly learn Wonderware and Windows Office programs: Word, Excel.

Physical Ability:

- Must be able to pass drug and alcohol free testing to meet CCR and DISA's aptitude to work requirement.

REQUIRED SKILLS

- Degree in a related field is required for immediate cross border eligibility – Bachelor of Science or Engineering (Mechanical, Chemical, Petroleum)
- Mechanically inclined and strong work ethics. A general knowledge of the name and use of common hand and power tools
- Eligible to work in the United States, Canada and any other countries
- Meeting qualifications to operate DOT vehicles is mandatory, and meeting qualifications for CDL Class 1 license is a plus.
- Valid Passport

- TWIC (Transportation Worker Identification Credential) an asset
- Citizenship or equivalent required to qualify for cross border work

Hiring for this position is ongoing and will be filled as required. To be considered for this position, please submit a resume to:
